

# Quick Installation Guide

## Zmodo Fox IP Camera

# 1 GETTING STARTED

**Note:**  
1. Please make sure that router's **DHCP** and **UPNP** are enabled before connecting Camera.  
2. The camera must be connected to your router using a network cable before it is set up to use Wi-Fi. Your mobile device must be connected to the same Wi-Fi network as the camera.

# 2 CONNECTING TO YOUR CAMERA ON iOS AND ANDROID

System Requirements: iPhone: iPhone v4.3 up and a valid iTunes account. Android: Android v2.3 up.

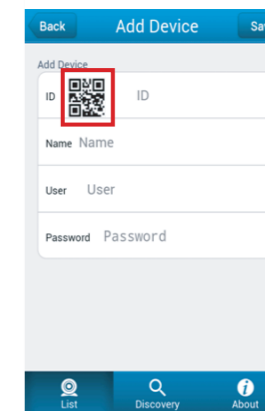

- Download and install Zmodo Zsight software from the App store(iPhone) or Google play (Android) or download from website:  
[www.zmodo.com/support-software/](http://www.zmodo.com/support-software/)
- Tap the icon from the home screen to open Zmodo Zsight, and click [Add], this will take you to the "Add Device" section.
- Tap the image of QR code, then scan the QR code area on the IP camera with your phone.

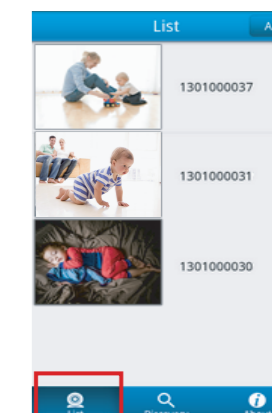

iPhone

Android

- The device will automatically enter the Wi-Fi interface.
- Select your Wi-Fi network. Enter the Wi-Fi password, and select [Save].
- Click [Next], enter the default password "111111", and click [Save].
- Disconnect the network cable and place the camera anywhere within the Wi-Fi signal range.
- Select the device from the [List] on your mobile device, and you will be able to see the video stream.

**Note:**  
If your phone can not scan QR code, please refer to Zviewer for phone (Android and iOS) Website: [www.zmodo.com/support-software/](http://www.zmodo.com/support-software/)

# 3 CONNECTING TO YOUR CAMERA ON PC

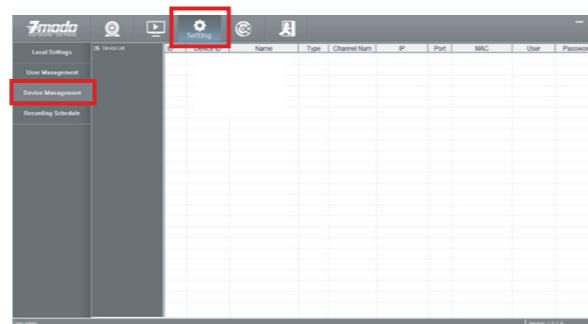

★ Install the ZViewer windows software from [www.zmodo.com/support-software/](http://www.zmodo.com/support-software/). There are two ways to connect your camera on PC.

## First Method: Remote connection by adding IP Camera's ID ★ Note: IP Camera and Internet must be connected.

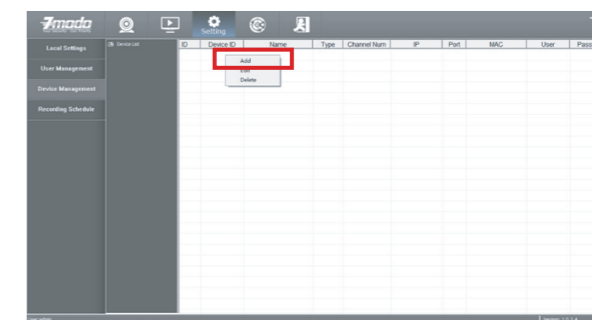

1 Launch ZViewer on your PC, enter "User Name" (Default: admin) and "Password" (Default: 111111), then click [Login].

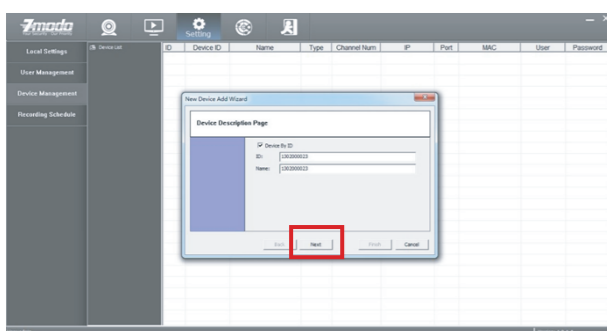

2 Find "Setting", and click [Device Management].

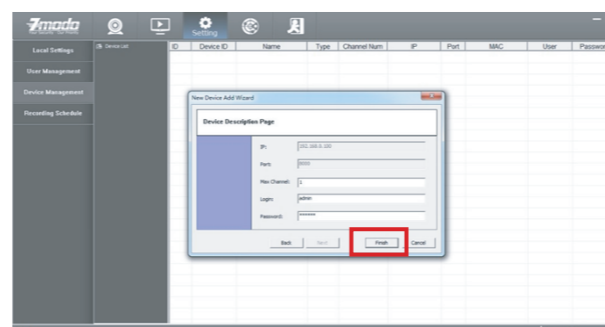

3 Right click in the blank area on the right, then select [Add].

4 Click [Device by ID], enter ID number, and click [Next].

5 Enter "Login" (Default: admin) and "Password" (Default: 111111), then click [Finish].

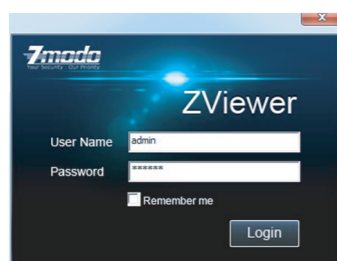

6 Go back to the Live interface, right click the device from the list, and select "open video", the video stream will display in the first available window.

## Second Method: Search your LAN ★ Note: IP Camera and PC must be in the same LAN.

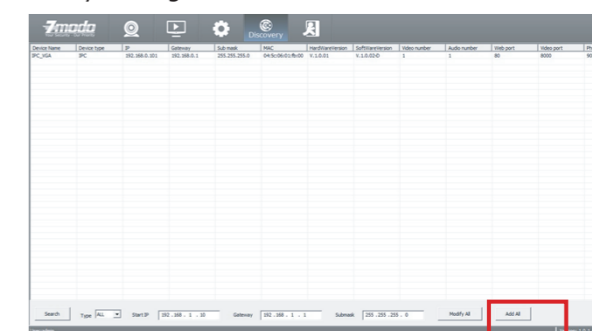

1 Launch ZViewer on your PC, enter "User Name" (Default: admin) and "Password" (Default: 111111), then click [Login].

2 Find "Discovery", and click [Search] on left bottom to search device.

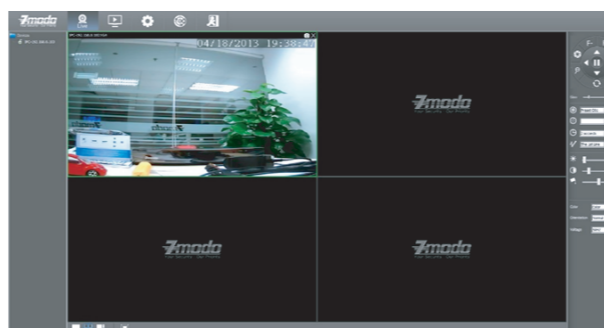

3 Click [Add all] to add your device, you will be prompted after successfully adding it.

4 Go back to the Live interface, right click a device name from the Device List, then click [Open Video].

5 The video can now be seen within your local network.

Follow the steps below to troubleshoot issues.

### 1 Unable to access IP Camera by 3G or Internet

Ensure router's hotspot is turned on.  
Ensure [UPNP] is enabled on the router.

### 2 Unable to access Internet after your device was successfully set-up.

Unplug the power of camera, wait 10 seconds then power the device again. The Wi-Fi function will restart.
